

Edit the Image to the right size

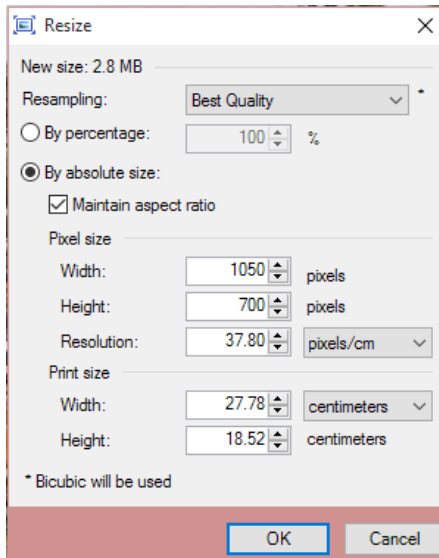

You need to have downloaded the paint.net software from getpaint.net and install it on your PC.

1. Slider image is optimized at 1050x350 and 308x201 (Column) pixel.

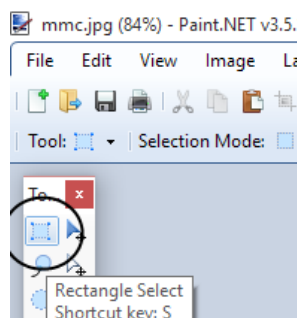

- Open the paint.net program and load the image → File → Open or select the image file or right click on the image file and use paint.net to open the file.
- Once the file is displayed. → Image → Resize

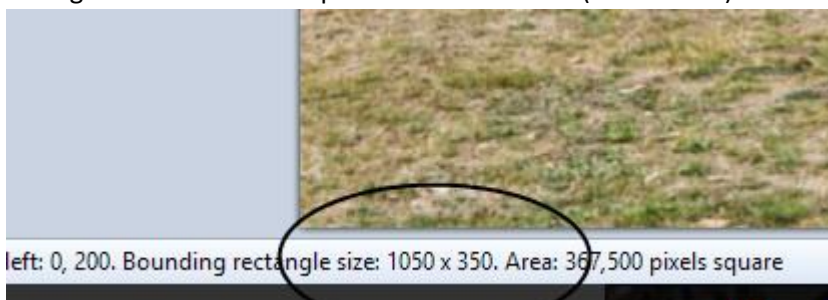

- Key in width "1050" or "308" then OK (make sure that the "Maintain aspect ratio" is checked).

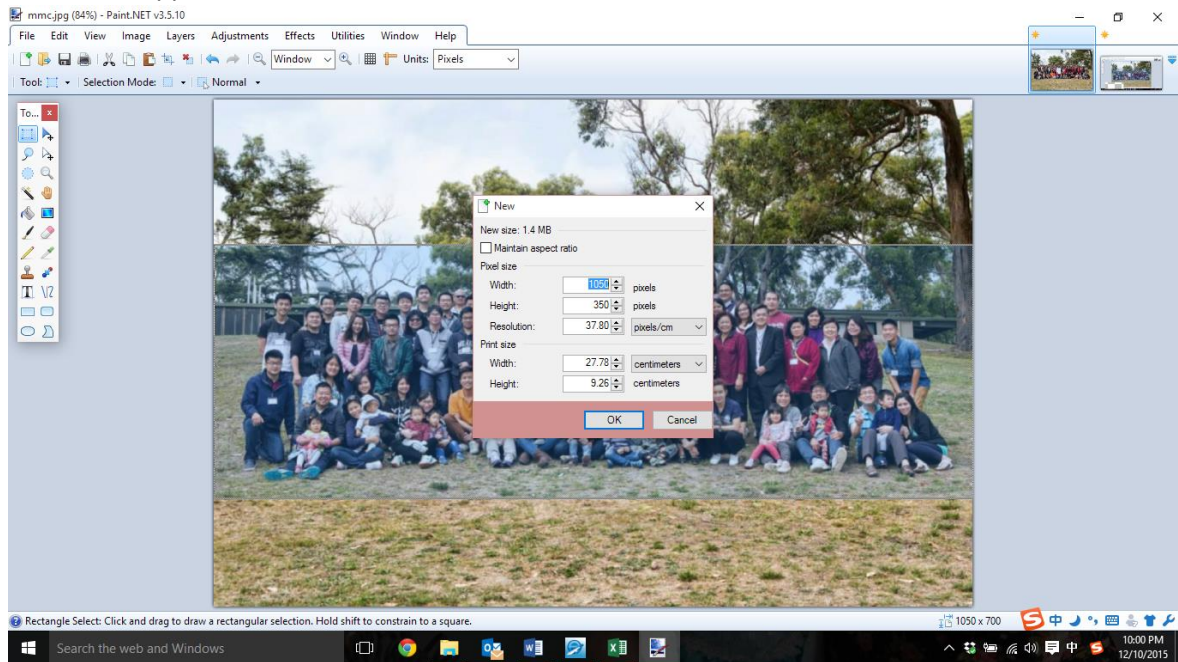

- Click on the crop box as shown below:

- Then click and hold the mouse button on the top left hand corner and drag to the right bottom corner to highlight the area you want to crop (cut). See the figure on the bottom bar to make sure that u get the right size of 1050x350 pixel as shown below (or 308x201) :

- Then let go your mouse button. → Ctrl+C to cut the picture. Then → File → New, the following screen will appear.

- Make sure the width is 1050 and height is 350. Then OK.
- A blank screen of 1050x350 will appear. Type Ctrl+V to paste the picture.
- Just→File →Save the file and drag the file to the “Media” folder of WP-ADMIN centre.
- Done!
